Work Experience

Software Engineer (Contractual)   Nov 2023 – Jun 2025
Syrincal Trading, OPC   Bulacan, PH

- Contracted as the sole architect and developer for a scalable B2B ordering platform, integrating supply chain, inventory management, and delivery tracking into one unified system using Next.js, Redux, Tailwind, Node.js, and Supabase
- Collaborated with the operations team to tailor the system to their operational needs, ensuring usability, maintainability, and alignment with their workflows, this doubled operational efficiency and reduced order processing time
- Managed maintenance, performance optimization, feature enhancements, and alignment with evolving business requirements

Full Stack Developer (Internship)   Jan 2025 – Apr 2025
Bone Fix Metal Craft Inc.   Metro Manila, PH

- Developed a PHP-based web module in collaboration with product management team—which enabled physicians to access product specifications and the clinical applications data for the company's orthopedic implants
- Implemented gated-access security controls, restricting portal access to verified physicians and ensuring data confidentiality

Web Developer (Freelance)   Sep 2024 – Dec 2024
D.R.A. Jewelry   Bulacan, PH

- Engaged on a fixed-scope freelance project with a defined 3-month timeline to build a mobile-first, fully responsive website using Next.js and Tailwind, implemented SEO optimization best practices to improve organic search visibility and integrated a private consultation scheduler via Web3Forms

Social Media Manager (Remote, Part-Time)   Jun 2023 – Jun 2024
We Whiten   Utah, USA

- Managed day-to-day social media marketing operations across social media platforms—including campaign planning, lead generation, client tracking, and appointment coordination—boosting lead conversion by 40% and doubling customer interest
- Planned influencer collaboration campaigns, recruiting micro-influencers to produce branded content, which drove a 50% increase in referral traffic and a 20% uplift in overall engagement

Projects

OJTfolio – Internship Progress Tracker   **Next.js | Supabase | OAuth**
A SaaS web application with file-upload support, daily-note time-entry logging, and automated weekly report generation that helps students monitor and document their on-the-job training hours.

E-Registrar – Capstone Project   **React | Electron | Firebase**
A queue management system with kiosk and real-time email notifications support designed to optimize service flow in school registrar offices.

Education

Our Lady of Fatima University   July 2025
Bachelor of Science in Information Technology

Certificates
